

WIDE RANGE OF

# VET SUTURES

SEAMLESS HEALING FOR EVERY CREATURE  
UNLEASH PRECISION

Dolphin Sutures proudly introduces an innovative addition to our product arsenal – Veterinary sutures. Vet Sutures are indispensable in ensuring the well-being of animals by facilitating proper wound closure and post-surgical recovery. Compared to regular sutures, Dolphin Sutures' strong needles offer enhanced durability and reliability, ensuring consistent performance even in challenging veterinary surgical procedures. Our innovative suture packaging box ensures clear printing for easy identification of size, needle dimensions, and suture length. Its design prevents deformation when stacked, enhancing convenience and safety for veterinary professionals.

## FLUORESCENT SUTURES

Dolphin Sutures proudly introduces an innovative addition to our product portfolio - Fluorescent Surgical Sutures. Engineered to elevate surgical precision, these sutures harness the power of fluorescence for optimal visibility in diverse lighting conditions. When these sutures are exposed to Black Light (UV Light), the sutures glow, thereby ensuring precise closure, which ultimately promotes better surgical outcome

## CASSETTE SUTURES

Dolphin Sutures delivers precision in healthcare with our surgical sutures in cassettes. Our products are meticulously designed for optimal performance in medical procedures, ensuring a perfect blend of strength and convenience.

**Reliable Sutures,  
Convenient Cassettes**

## ANTIBACTERIAL SUTURE RANGE

Introducing Dolphin Sutures Antibacterials, the world's largest range of antibacterial sutures range for preventing surgical site infections (SSIs). Our sutures are coated with Triclosan, a powerful antibacterial agent, to ensure patient safety and surgeon confidence. Backed by research, our Antibacterials reduce bacterial adherence, promoting faster healing.
